PROJECTS

NovaCart E-commerce Analysis | Excel, PostgreSQL, Power BI

GitHub: github.com/AdeoluBams/Nova_Cart_Analysis

- Conducted an end-to-end sales and operations analysis of an e-commerce dataset using Excel, PostgreSQL, and Power BI to evaluate revenue performance, customer retention, and brand conversion.
- Developed advanced SQL queries using CTEs, window functions, aggregations, and date functions to calculate profit margins, customer retention rates, and brand funnel conversion metrics.
- Designed an interactive Power BI dashboard visualizing KPIs, sales trends, customer behavior, and brand performance to support business decision-making.
- Identified key business insights, including a 13% profit margin, significant customer retention challenges, top-performing products and brands, and opportunities to improve conversion and reduce customer drop-off.

QuantEdge Financial Analysis | PostgreSQL, Power BI

GitHub: github.com/AdeoluBams/Quant_Edge_Financial

- Conducted an end-to-end analysis of a financial trading platform using Excel, PostgreSQL, and Power BI, evaluating \$17.87B in portfolio assets across profitability, customer behavior, trading performance, and risk.
- Built an interactive Power BI dashboard visualizing portfolio performance, trading KPIs, customer demographics, and risk indicators to support data-driven investment insights.
- Discovered that crypto trading generated 96% of total trader profits (\$1.34B), the platform earned \$362.98M in fee revenue, stocks recorded 6,291 trades, and customers aged 26–50 were the most active traders.

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Afriment X Nykon, Remote

June 1 - June 30 2026

- Researched and evaluated 40+ companies across Africa's technology ecosystem to identify high-value prospects aligned with Nykon's target market.
- Conducted competitive analysis of leading workforce productivity platforms, identifying feature gaps and strategic positioning opportunities.
- Built a lead prioritization model to support and improve sales outreach by 40%. It ranks prospects based on market fit, growth stage, and operational characteristics.
- Developed executive-ready reports on market trends, customer segmentation, and go-to-market opportunities to support business development.
- Collaborated with cross-functional teams to communicate insights using professional reports and presentations.

Data Analyst Intern | Decode Labs, Remote

18 May - 18 June 2026

- Conducted exploratory data analysis using Stata and Python to identify business trends and support hypothesis generation.
- Queried relational databases using SQL to retrieve and analyze data from multiple tables.
- Created dashboards visualizing KPIs and trends, including a 13% decline in yearly growth, enabling easier monitoring of project performance.
- Collaborated with mentors and team members to translate analytical findings into practical business recommendations.

EDUCATION

B.Tech in Statistics

Federal University of Technology Akure, Akure, Nigeria

2024 - 2028

COURSES & CERTIFICATIONS

- Aspire Leaders Program (ALP) – *Harvard Business School*
- Python for Data Analysis – *Alison*
- Data Analysis Bootcamps – *FreeCodeCamp, Intellipaat*

July 2026

November 2025

2025 - 2026
